ACHIEVEMENTS

- XMUM Leader of the year Finalist
- XMUM Best Innovative Event Finalist
- XMUM Most Active Non-sport Club Finalist
- XMUM Xnergy Sport Carnival Event Planner
- XMUM First Aid Society Advisor & President
- XMUM Dragon & Lion Dance Troupe Advisor
- XMUM Dragon & Lion Dance Troupe Vice President

LANGUAGE

- English
- Bahasa Melayu
- Mandarin

ABOUT ME

Python-powered AI Trainer specializing in aligning large language models for enterprise reliability. I architect end-to-end fine-tuning pipelines and implement RLHF reward models to drastically reduce hallucinations. I bridge cutting-edge research with production-grade, cost-efficient AI solutions. AI Trainer & Python developer driving hallucination-free LLMs. I build custom SFT/RLHF pipelines, optimize inference with vLLM, and turn raw data into enterprise-grade conversational AI that delivers measurable business impact.

EDUCATION

Bachelor's Degree in Artificial Intelligence (Honour) 2027

Xiamen University Malaysia, Sepang, Selangor
Relevant Specializations: Natural Language Processing (NLP), Deep Learning, Machine Learning, Data Mining, Statistics & Probability.

Foundation in Science 2022-2023

Xiamen University Malaysia, Sepang, Selangor
Key Modules: Advanced Mathematics, Physics, Fundamental Computer Science, Chemistry, English for Academic Purposes, Study Skills, Effective Presentation, Ethics in Science

Sijil Pelajaran Malaysia (SPM) 2022

Academic Excellence: Achieved A+ in Mathematics, Advanced Mathematics, Chemistry, and Physics, demonstrating strong analytical and problem-solving capabilities.

PREVIOUS WORK

2D Pickle Ball — RL in Unity (PPO)

Trained RL agent for 2D pickleball—reward shaping, self-play, and policy optimization in Unity.

Texas Poker Bot— MCTS

Monte Carlo Tree Search for Texas Hold'em — decision under uncertainty, simulation, and opponent modeling.

TradingView Automation - RL (PPO)

Designed and deployed a fully automated trading signal generator for equity/fiat markets using Proximal Policy Optimization (PPO). I built a custom OpenAI Gymnasium environment that simulates real-time market dynamics.

Data Analysis — Multifield

My process involves rigorous data cleaning, exploratory data analysis (EDA) using Pandas and SQL, statistical hypothesis testing, and translating raw numbers into compelling narratives through interactive visualizations
